### **Heating Issues Related to the Joe Greenland Centre**

My questions are for the Minister responsible for the Northwest Territories Housing Corporation:

1. What type of heating system is in place at the Joe Greenland Centre in Aklavik;
2. What was the additional cost of electricity due to use of space heaters by elders in the Joe Greenland Centre, from September 1, 2015 to June 1, 2016;
3. What is the expected cost to the Government of the Northwest Territories of installing additional radiators in the recently built Joe Greenland Centre; and
4. Will the Minister provide any analysis done on the feasibility of using a wood pellet heating system in the Joe Greenland Centre, including the results?
